

Electronic Conspicuity

See. Be Seen.

Electronic Conspicuity (EC) is an umbrella term for technology that helps pilots, UAS Operators, and Air Traffic Services be more aware of what is operating in surrounding airspace.

EC devices – like the uAvionix SkyEcho for general aviation and the ping1090i for UAS – are approved under a process defined by UK CAA CAP1391 and use ADS-B Technology to see other EC equipped aircraft and show fellow airmen your position for improved situational awareness.

UK EC REBATE SCHEME

Get a £250 Rebate on SkyEcho & ping1090i

The UK DfT and CAA are offering pilots and UAS Operators a £250 rebate against the purchase of eligible EC devices.
